МАТЕМАТИЧЕСКИЙ СБОРНИК
Том 116 (158) (1981), вв. 1–4
MATHEMATICS OF THE USSR-SBORNIK
Volume 44, Numbers 1–4, 1983

AUTHOR INDEX

Anikonov, Ju. E. and Stepanov, V. N. *Uniqueness and stability of the solution of a problem of geometry in the large* 483

Arnautov, V. I. and Mihalev, A. V. *Topologies on a ring of polynomials, and a topological analogue of the Hilbert basis theorem* 417

Artamonov, V. A. *Projective nonfree modules over group rings of solvable groups* .. 207

Bazilevič, I. E. *A criterion for univalence of regular functions with a positive Hayman constant* 261

Borisenko, A. A. *On the extrinsic geometric properties of parabolic surfaces and topological properties of saddle surfaces in symmetric spaces of rank one* 401

Drožžinov, Ju. N. *Passive linear systems of partial differential equations* 269

Egorov, A. I. *Lacunary Finsler spaces* 279

Egorov, Ju. V. *Equations of principal type. Sufficient conditions for local solvability* 517

Evdokimov, S. A. *Letter to the editor* 545

Evgrafov, M. A. *On estimates of the fundamental solution of an elliptic equation with a small parameter* 1

Fokin, M. V. *On limit sets of trajectories of dynamical systems of gradient type* 447

Gabov, S. A. *On the spectrum and bases of eigenfunctions of a problem connected with oscillations of a rotating fluid* 219

Govorov, V. E. *Algebras of homological dimension 1* 97

Gribkov, I. V. *The problem of the correctness of Schur's theorem* 471

Hryčev, D. A. *On a certain stochastic quasilinear hyperbolic equation* 363

Huhro, E. I. *On a connection between Hughes' conjecture and relations in finite groups of prime exponent* 227

Julmuhametov, R. S. *Sufficient sets in a certain space of entire functions* 389

Karlovič, Ju. I. and Kravčenko, V. G. *Systems of singular integral equations with a shift* 75

Kondratjuk, A. A. *On the method of spherical harmonics for subharmonic functions* 133

Kravčenko, V. G. See Karlovič, Ju. I.

Kuznecov, M. I. *Graded Lie algebras with zero component equal to a sum of commuting ideals* 511

Lipcer, R. Š. and Širjaev, A. N. *On weak convergence of semimartingales to stochastically continuous processes with independent and conditionally independent increments* 299

Mackjavičjus [Mackevičius], V. *Symmetric stochastic differential equations with non-smooth coefficients* 527
Markuševič, D. G. *Numerical invariants of families of lines on some Fano varieties* 239
Maz'ja, V. G., Nasarov, S. A. and Plamenevskiĭ, B. A. *Asymptotics of solutions of the Dirichlet problem in a domain with a truncated thin tube* 167
Mihalev, A. V. See Arnautov, V. I.
Mikljukov, V. M. *Some singularities in the behavior of solutions of equations of minimal-surface type in unbounded domains* 61
Musin, O. R. *Generators of S^1-bordism* 325
Nasarov, S. A. See Maz'ja, V. G.
Nikol'skiĭ, M. S. *On the alternating integral of Pontrjagin* 125
Plamenevskiĭ, B. A. See Maz'ja, V. G.
Rozenblat, B. V. See Važenin, Ju. M.
Rozendorn, È. R. *Bounded complete weakly nonregular surfaces with negative curvature bounded away from zero* 501
Ryškov, S. S. and Šušbaev, S. Š. *The structure of the L-partition for the second perfect lattice* 195
Šaronov, S. È. *On holomorphic mappings of polyhedra* 117
Šatalov, V. E. See Sternin, B. Ju.
Sirašudinov, M. M. See Žikov, V. V.
Širjaev, A. N. See Lipcer, R. Š.
Sljusarčuk, V. E. *Invertibility of almost periodic c-continuous functional operators* 431
Stepanov, V. N. See Anikonov, Ju. E.
Sternin, B. Ju. and Šatalov, V. E. *On a method of solving equations with simple characteristics* 23
Šušbaev, S. Š. See Ryškov, S. S.
Tjurin, S. A. *On Cartan subalgebras of a general Lie algebra of Cartan type* 491
Turaev, V. G. *Multiplace generalizations of the Seifert form of a classical knot* 335
Vancjan, A. G. *Triangular imbeddings of regular graphs* 459
Važenin, Ju. M. and Rosenblat, B. V. *Decidability of the positive theory of a free countably generated semigroup* 109
Zaĭcev, M. V. *On decomposability of commutators of varieties of Lie algebras and groups into products* 283
Zak, F. L. *Projections of algebraic varieties* 535
Žikov, V. V. and Sirašudinov, M. M. *The averaging of nondivergence second order elliptic and parabolic operators and the stabilization of solutions of the Cauchy problem* 149
